Precise Nutrition

GROWIN

Vensaad Broiler Premix (VBP)

PRECISE NUTRITION · LOCAL ADAPTATION · STABLE EFFICIENCY

THX SPRING BIOTECHNOLOGY CO., LTD.
2908 BEICHENG INTL, NO. 88 LONGHUA AVE, YUBEI DIST, CHONGQING, CHINA
www.thxspring.com thx@thxspring.com

We deliver reliable and sustainable feed premix, scientifically designed for local conditions, raw materials. Built upon the stable VBP Base formula, VBP Pro integrates functional materials, and production goals to ensure optimal nutrition, efficiency, and animal health.

Formulas tailored to local raw materials and farming systems

CUSTOMIZATION

LOCALIZATION

Adapted to regional climates and feed ingredients

STABILITY

Ensuring consistent nutrition and reliable production outcomes

STABLE AND PRECISE NUTRITION FOUNDATION

Delivers standardized multi-vitamin and mineral nutrition to secure consistent production performance. Formulas can be finely adjusted to fit different raw material systems and management models, ensuring stable quality and performance across regions.

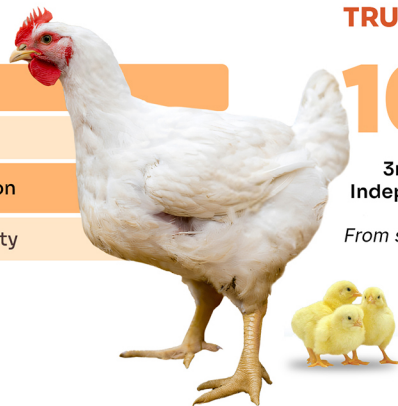

VBP BASE TECHNICAL HIGHLIGHTS

- Precise vitamin–mineral balance to meet the micronutrient demands of rapid growth.
- Combination of inorganic and organic minerals, ensuring both absorption efficiency and cost control.
- Regionally optimized design to adapt to variations in raw materials and farming environments.
- Enhanced nutritional stability and batch-to-batch consistency through strict quality control.
- Improved stress resistance and immune function supported by key antioxidant nutrients and trace elements.

STAGE-SPECIFIC OBJECTIVE

STAGE	SPECIFIC OBJECTIVE
STARTER	Early immune and skeletal development
GROWER	Rapid growth and optimized feed conversion
FINISHER	Enhanced weight gain and carcass uniformity

Recommended Inclusion Rate : 0.1% – 0.5%
Application Stages : Starter | Grower | Finisher

FUNCTIONAL UPGRADE, TARGETED PERFORMANCE

Built upon the stability of VBP Base, VBP Pro integrates a range of functional additives to enhance gut health, immunity, stress tolerance, lipid metabolism, and meat quality.

VBP BASE + KEY SELECTABLE FUNCTIONAL DIRECTIONS = VBP PRO

- 01** Improved average daily gain (ADG) and feed conversion ratio (FCR)
- 02** Enhanced gut integrity and disease resistance
- 03** Reduced heat and metabolic stress impacts
- 04** Strengthened immune modulation and growth uniformity
- 05** Increased dressing yield and improved meat texture and color
- 06** Mitigation of coccidiosis challenges
- 07** Enhanced nutrient digestibility and absorption

Key Selectable Functional Directions

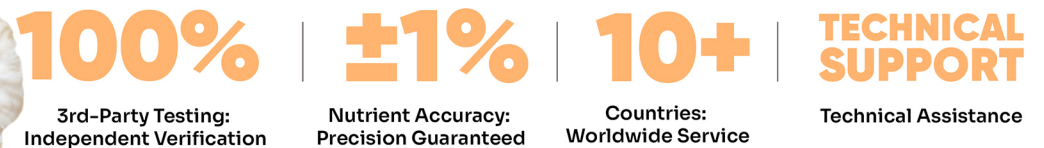

OBSERVED PERFORMANCE (REFERENCE ONLY)

**Data verified by internal trials and customer field performance.*

Recommended Inclusion Rate: 0.5% – 3%
Application Stages: Starter | Grower | Finisher

TRUSTED QUALITY, PROVEN PERFORMANCE

From stable nutrition to functional enhancement — VENZAAD powers better performance .
