Precise Nutrition

BEEFAST

Vensaad Beef Cattle Premix (VBCP)

PRECISE NUTRITION . LOCAL ADAPTATION . STABLE EFFICIENCY

THX SPRING BIOTECHNOLOGY CO., LTD.
2908 BEICHENG INTL, NO. 88 LONGHUA AVE, YUBEI DIST, CHONGQING, CHINA
www.thxspring.com thx@thxspring.com

We deliver reliable and sustainable feed premix, scientifically designed for local conditions, raw materials. Built upon the stable VLP Base formula, VLP Pro integrates functional materials, and production goals to ensure optimal nutrition, efficiency, and animal health.

Formulas tailored to local raw materials and farming systems

CUSTOMIZATION

LOCALIZATION

Adapted to regional climates and feed ingredients

STABILITY

Ensuring consistent nutrition and reliable production outcomes

VBCP Base

STABLE, PRECISE NUTRITION FOUNDATION

Provides a standardized multi-vitamin and mineral formulation, serving as a stable nutritional foundation for beef cattle. Formulations can be flexibly optimized according to local raw materials and feeding models to ensure nutrient stability and batch consistency.

VBCP BASE TECHNICAL HIGHLIGHTS

- Promotes rumen health and fiber digestion, supporting the ruminant's natural digestive function.
- Precisely balanced vitamin–mineral ratios meeting nutrient needs from calf to fattening stage.
- Strengthens stress resistance and immune capacity during growth and finishing periods.
- Adapted formulations for different raw material systems and feeding environments.
- Combines organic and inorganic minerals for efficient absorption and cost control.
- Ensures stable nutrition and consistent quality across batches.

STAGE-SPECIFIC OBJECTIVE

STAGE	SPECIFIC OBJECTIVE
CALF	Early immunity and rumen development
GROWING	Rapid growth and skeletal development
FINISHER	Weight gain efficiency and optimized feed conversion

Recommended Inclusion Rate : 0.2% – 1%
Applicable Stages : Calf | Growing | Finisher

VBCP Pro

FUNCTIONAL UPGRADE, TARGETED PERFORMANCE

Built upon the solid nutritional foundation of VBCP Base, VBCP Pro integrates functional additives to enhance rumen efficiency, growth rate, immune performance, and feed conversion.

VBCP BASE + KEY SELECTABLE FUNCTIONAL DIRECTIONS = VBCP PRO

- 01 Balanced energy–protein metabolism and reduced metabolic fluctuations.
- 02 Enhanced daily gain and improved feed conversion ratio (FCR).
- 03 Improved growth uniformity and overall health performance.
- 04 Optimized rumen fermentation and fiber digestibility.
- 05 Supported immune function and stress resistance.

Key Selectable Functional Directions

OBSERVED PERFORMANCE (REFERENCE ONLY)

INDICATOR	AVERAGE IMPROVEMENT
Average Daily Gain	+ 4–10 %
Cost Efficiency (Profit Margin)	+2–5%

Data verified by internal trials and customer field validations.

Recommended Inclusion Rate : 1% – 5%
Applicable Stages : Calf | Growing | Finisher

TRUSTED QUALITY, PROVEN PERFORMANCE

100% | **±1%** | **10+** | **TECHNICAL SUPPORT**

3rd-Party Testing: Independent Verification | Nutrient Accuracy: Precision Guaranteed | Countries: Worldwide Service | Technical Assistance

From stable nutrition to functional enhancement — **VENSAAD** powers better performance .
